# Amr Nour Eldin Shehab

**Application Support | Technical Support**
Location: Eshnaway, Santa, Gharbia, Egypt | Phone: 01029671620 | Email: amrnour2005@gmail.com

## Summary

On-call IT support professional with 3+ years of ongoing, per-incident experience at a printing press, providing support as issues are reported. Experienced in troubleshooting Windows and Linux systems, hardware and software faults, OS and driver installations, and local network, printer, and internet problems. Owner and maintainer of QuantixPro, a custom wholesale ERP/POS system used by one real client, with responsibility for deployment, maintenance, updates, and client support. Strong practical Vue.js skills and project experience with C#/.NET/ASP.NET Core.

## Experience

### On-Call IT Support

El-Ghobashi Printing Press — Gharbia, Egypt | 3+ Years | Ongoing

- Provide on-call, per-incident IT support for staff, responding to reported issues as they arise.
- Troubleshoot Windows and Linux systems, hardware, software, and end-user issues, assisting staff directly.
- Install and configure operating systems, drivers, and applications; perform basic hardware maintenance and component replacement.
- Troubleshoot local network, printer, and internet connectivity problems.
- Investigated a malware incident, located hidden files, and recovered affected work files.

### Production Tracking Assignment

El-Ghobashi Printing Press — Gharbia, Egypt | ~2 Months

- Collected daily production progress updates from supervisors.
- Monitored production progress, stoppages, and operational issues, and followed up with supervisors on interruptions.
- Maintained production records and status updates using Microsoft Excel and Word.

## Projects

### QuantixPro: Wholesale ERP/POS System

Independent Project | Owner, Developer & Maintainer | Ongoing

- Own and maintain QuantixPro, a custom wholesale ERP/POS system used by one real wholesale business client.
- Plan and coordinate implementation, architecture, and integration; handle deployment, maintenance, updates, bug fixing, and client support, including feedback.
- The system covers sales and purchases, inventory, customers and suppliers, employees and payroll, user permissions, event logging, backups, licensing, and self-updates.
- Built with Vue 3; C#, .NET 10, and ASP.NET Core; Entity Framework Core; PostgreSQL; REST APIs; and Server-Sent Events (SSE).
- Implement the system with extensive use of AI-assisted development tools, while directing the overall implementation and delivery.
